### Diaphragm Seal Suitability Guide

Low pressure capsule gauges are very sensitive and require diaphragm seals with high sensitivity and high fluid displacement. If a diaphragm seal is required to isolate the process fluid from the pressure gauge, the following seal model types are available for the Series PC.

#### Diaphragm Seal Model

High Displacement

		Total Gauge Span* (in H <sub>2</sub> O)									
		10"	15"	20"	30"	40"	60"	100"	160"	200"	300"
W6	X	X	X	X	X	X	X	S	S	T	T
W7	X	X	X	S	S	T	T	T			
V5	X	S	S	T	T	T	T	T			
T6	X	X	X	X	X	S	S	S	S	S	

\*Total gauge span is additive of negative and positive pressures.

Example: -15 - 0 - 30 psi = 45 psi span

- Assembly will function correctly with minimal accuracy degradation.
- T** Assembly will function correctly given stable temperature.
- S** Assembly is highly sensitive to orientation and temperature variance. REOTEMP cannot guarantee a stated accuracy.
- X** Assembly will not work. The diaphragm does not displace enough fill fluid to drive the pressure gauge.
